

THE BLAIRMORE ENTERPRISE

VOL. XVI. NO. 12.

BLAIRMORE, ALBERTA, THURSDAY, MARCH 26, 1925.

\$2.00 PER ANNUM

OBITUARY

The death occurred at Pincher Creek on March 19th, of Mr. Alfred Thomas Connelly, in his sixty-fourth year. Mr. Connelly came west from Windsor Mills, Quebec, about thirty-five years ago and was the last of a family of nine brothers. He is survived by his only sister, Mrs. Beebe, of Pincher Creek. His father, Mr. Robert Connelly, passed away about a year ago. He is survived by his wife, Mrs. Elizabeth Connelly, two sons, Alfred and Ernest, and two daughters, Mrs. Kettles and Miss Norah. The remains were laid to rest at Pincher Creek on March 21st.

ANNIVERSARY SERVICES

Rev. E. G. Hansell, of Westbourne Baptist church, Calgary, will be the preacher at the special anniversary services at the Union church on Sunday next, at 11 a.m. and 7.30 p.m. A special invitation is extended to all to attend these services.

The morning service will take the place of the adult Sunday school and will be a public service. Special music will be rendered by the choir. Rev. Hansell is one of the ablest preachers in the province and all should avail of this opportunity to hear him.

MANAGING DIRECTOR HILLCREST COLLIERIES MAKES STATEMENT

The following statement has been given out by Mr. J. M. Mackie, managing director of the Hillcrest Collieries, after several weeks stay in Hillcrest, hoping the miners would come to terms and settle down to work. We understand that, as far as the Hillcrest Collieries are concerned, their stand is definite, as Mr. Mackie's last instructions were to "operate on the Fernie scale or not at all." Hillcrest, Alberta, March 21, 1925.

To Our Employees:

My Dear Sirs,—Notwithstanding the statements of your District Officers, we assure you that the orders for coal available at present will not be obtainable in their entirety for more than a short time. Contracts will be let to bring American coal up the lakes, and our portion of this business again lost to you and us. We wish you to bring yourselves to realize that your interests and the company's interests are, in the main, identical. Contracts to us mean work for you—we cannot be successful unless you are successful, and vice versa.

What justification can there be for the present wage of 72c an hour as a minimum for ordinary labor outside the mine all other rates being higher in proportion? You may hold out for high wages, but you get little or no work as evidenced by the fact that during the past twelve months you have only averaged a total of about 43 full days' pay. The Coal Operators have lost money and you have depleted your savings, but your paid agitator has flourished through it all on money you provided him with. The men in our Camp during the past ten years, have paid \$64,580.00 into the Union Fund, which sum, if invested semi-annually at six per cent would amount to \$85,000.00. How much of this Fund are your officials advancing to you today? Not a cent. They keep it to themselves and tell you to remain idle, a state of affairs which is not only preposterous but a blow at the freedom of Canadian Workers and Canadian Industry.

Your District Officers have advised you that the contract with the Operators does not expire until September 30th next, and that you should remain idle until that time rather than meet market conditions. If the Union officials had always in the past kept their contracts with the Operators, they might with better grace make this suggestion to you now. The facts are, however, that in the past the Officials of the United Mine Workers of America have not hesitated to avail themselves of every opportunity to obtain an increase in wages contrary to, and in violation of then existing contracts. There is therefore ample precedent to terminate a contract which has availed the worker little, prevented the Operator from obtaining business, and is therefore today an ineffective document which was forced upon us last fall against our better judgment, as evidenced by the letter addressed to our employees at that time, outlining the business position of the Coal Industry.

It has been suggested that we post a scale of wages conforming to the Fernie wage scale, and this we have no hesitation in doing. You will, therefore find the revised wage scale posted at the Time Keeper's Office, and our Mine Manager will be at his office ready to sign on any men willing to work on this basis. As soon as a sufficient number of men are signed on, we will again open up our mines. Yours most respectfully,

J. M. MACKIE,

Managing Director.

An auction sale of horses and implements will be conducted by H. D. Gerry on the ranch of Thomas Hammond, nine miles north of Pincher Station, on Monday, April 6th.

RUMOR MINES CLOSING DENIED BY OPERATORS

Absolute denial was given Tuesday evening of a report emanating from Lethbridge to the effect that the operators at Blairmore, Bellevue and Coleman had posted notice that their mines would be closed as those at Hillcrest had been until a wage cut equivalent to the Fernie scale was accepted by the miners. Both R. M. Young, commissioner for the Western Canada Coal Operators' association, and O. E. S. Whitesides, general manager of the International Coal and Coke company, Coleman, denied the report.

Mr. Young, when shown the report, said that it could not be true for he said, "I think I would have known if any of the companies in the association had posted any such notices." All three mines are in the association. Mr. Young suggested that if any notices had been posted up it might have been from the miners, but not from the operators, who might have been trying to find out how the men stood in regard to a cut and that the correspondent had gotten the two mixed.

Mr. Whitesides, upon being called over long distance, denied that any notices by either miners or operators had been posted in Coleman, and he was confident that the same was true of Bellevue and Blairmore. He stated that had such notices been posted, Mr. Young would have been informed.

"Have you in mind to post any such notices?" he was asked.

"No," he replied. "We are sending out notices of our intention to cancel the agreement at the end of six months, but that is all."

The report referred to above from Lethbridge reads:

"The situation in the Crows' Nest Pass steam coalfield is rapidly moving towards a crisis. The Hillcrest collieries have shut down, but if sufficient men sign up on the basis of the Fernie agreement, which carries a reduction from the Alberta wage scale of from \$1.25 to \$2.00 a day, it will be reopened under a new and separate agreement."

"Blairmore, Bellevue and Coleman are following suit. Notices are being given that the mines will close tight after thirty days. This, of course, means if a new agreement is not negotiated." It is insisted that the rank and file of the men are willing to take a wage cut in the interests of peace, and a resumption of work, as the condition in scores of homes is reported to be extremely pitiful. —Albertan.

SMITH-EVANS NUPTIALS

A pretty wedding ceremony took place at the Union church, at 4 p.m. yesterday, in which Miss Lillian Canada Evans, daughter of Mrs. Susan and the late William O. Evans, and Mr. Evan John Smith, of Beaver Mines, were the contracting parties.

The ceremony was performed by the pastor, Rev. W. T. Young, in the presence of a throng of interested friends. The bride was attended by Miss Winnie Christophers, while Mr. Griffin Smith, brother of the groom, acted as best man.

Following the ceremony the party repaired to the Lodge Hall, where about ninety people sat down to a sumptuous spread. Following the supper, dancing was indulged in until after midnight, Mason's orchestra furnishing delightful music.

Mr. and Mrs. Smith were the recipients of a large number of valuable and useful presents. They will likely make their home in Blairmore.

Mr. A. L. Freebairn, of Pincher Creek, will be at the F. M. Thompson Company's main store on Tuesday next, April 1st, showing an extensive range of the very latest models and materials in ladies' coats, dresses, etc. Call in and let them show you these goods.

COUNCIL MEETING

The regular meeting of the town council was held on Monday night, Mayor McLeod and Councillors Gillis, Montalbetti, Ferguson, Hays, Patterson and Sartoris in attendance.

The minutes of previous meeting were adopted as read and several small accounts were passed for payment.

A by-law to amend License By-Law No. 4, as respecting non-resident bakers, received three readings and was finally passed. By this amendment the license fee for non-resident bakers has been raised from \$10 to \$25.

On motion, it was decided that Mr. G. F. Johnson, of Fernie, be retained as auditor for the year 1925.

Secretary Wright was appointed assessor for the year 1925.

The C.P.R. are using Chinese as spotters on trains.

THE WINNIPEG KIDDIES AT OPERA HOUSE TONIGHT

The Winnipeg Kiddies appear at the local opera house tonight. Speaking of the show, Mr. W. A. R. Coey, a Lethbridge critic, states: "A show of decided merit, very attractively, most delightfully put on, and in a highly entertaining fashion, was that of the Winnipeg Kiddies at the Palace theatre on Monday night. It was a juvenile entertainment of considerable worth, and lost nothing in its being an exhibition of juvenile talent. The youngsters were as clever a set of juveniles as one would care to see, with beautiful, clear and musical voices trained to a high degree of finish."

The regular monthly meeting of the Board of School Trustees will be held at the school house tomorrow night at 8 o'clock.

A Romance of the Spanish Main CAPTAIN BLOOD by RAFAEL SABATINI

Copyrighted, 1922, by Rafael Sabatini.
"CAPTAIN BLOOD," a Vinograph picture with J. Warren Kennerly
in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Peter Blood, a young Irish physician, who had been wrongly condemned as a slave to the Barbadoes under King James, falls in love with Arabella, niece of the military commander, at Bridgetown. He leads his fellow rebels-convicted in an attack on a Spanish ship which had laid the city low and captures it. He sails for Tortuga, the rendezvous of the pirates of the Spanish Main. His accomplice, a Frenchman, a Frenchman, with Levasseur, a Frenchman, and his ship, under him, Madelon O'Gorman, daughter of the friendly Dutch governor of Tortuga, is fascinated by Levasseur. Levasseur, a Dutch brig on which is Madelon and her brother, Blood lands at the island where Levasseur proposes to hold her as a hostage for ransom. Captain Blood pays the ransom. Levasseur draws and Captain Blood runs him through. Calabash, his aide, enlists with Blood, who makes Madelon and her brother his guests on board his ship.

CHAPTER XVI

The Milagrosa
In Tortuga, during the months he spent there refitting the three ships he had captured from the fleet that had come out to destroy him, he found himself almost an object of worship in the eyes of the wild brethren of the Coast, all of whom now clamored for the honor of serving under him. It placed him in the rare position of being able to pick and choose the crews for his augmented fleet. He chose fastidiously. When next he sailed away it was with a fleet of five fine ships in which went something over a thousand men. Thus you behold him not merely famous, but virtually formidable. Three captured Spanish vessels he had renamed with a certain scholarly humor the *Clotho*, *Lachesis* and *Atropos*, a grimly-jocular manner of conveying to the world that he made them the arbiters of the fate of any Spaniards he should henceforth encounter upon the seas.

And meanwhile the Spanish Admiral, Don Miguel de Espinosa, went raging up and down the Caribbean seeking his enemy, and in the meantime, as an hour's discovery of his vicinity, he fell upon any ship of England or of France that loomed above his horizon. This illustrious sea-captain and great gentleman of Castile had lost his head. And so, reckless of the fact that Captain Blood was not in vastly superior strength, the Spaniard sought him up and down the trackless seas. But for a whole year he sought him vainly. The circumstances in which eventually they met were very curious.

On the 15th September of the year

ONTARIO WOMAN REGAINS HEALTH

Wants Other Women to Know
About Lydia E. Pinkham's
Vegetable Compound

"Mount Forest, Ont.—'Before I took Lydia E. Pinkham's Vegetable Compound I was in a miserable state, and had to be taken through the hospital. I was living in Allen Craig at the time and was advised to take her compound and I did. I began to get stronger and then I was able to leave the hospital. I am now in good health and I can take in food and sleep like a normal woman. For sale by all druggists."

Wherever throughout the Dominion you find English in Lydia E. Pinkham's Vegetable Compound.

Grain Inquiry Cost

The total cost of the royal grain enquiry commission was \$170,610. This information was given to Hon. R. J. Macdonald, Conservative, by Hon. T. A. Low, minister of trade and commerce. Fees and living allowance paid to counsel of the commission totalled \$44,525. Of this amount \$3,300 was paid to D'Arcy Scott, \$13,177 to S. R. Woods, and \$18,255 to J. P. Fisher.

The Royal Mary was warped out of St. Nicholas. Each could tell the other much upon which the other desired information. Considering how his mind was obsessed with the business of his mission, it is not wonderful that he should have come to talk to her of Captain Blood. Indeed, there was a circumstance that directly led to it. "I wonder now," he said, as they were sauntering on the poop, "if you ever saw this fellow Blood, who was at one time in your uncle's plantations as a slave."

"I saw him often. I know him very well."
"Ye don't say!" and came to lean beside her. "And what manner of man did you find him?"
"In those days I esteemed him for an unfortunate gentleman."

"You were acquainted with his story?"
"He told it me. That is why I esteemed him—for the calm fortitude with which he bore adversity. Since then, considering what he has done, I have almost come to doubt if he told me of himself was true."

"If you mean of the wrongs he suffered at the hands of the Royal Commission, that tried the Monmouth rebels, there's little doubt that it would be true enough. He was never out with Monmouth; that is certain. He was convicted on a point of law which he may have been ignorant when he was convicted what was construed into treason. But, faith, he's had his revenge, after a fashion."

"That," she said in a small voice, "is the unforgivable thing. It has destroyed him—deservedly."

Lord Julian was seeking to comfort and encourage her.

"Destroyed him?" His lordship laughed a little. "No more so sure of that. He has grown rich. I hear. He has translated, so it is said, his Spanish spoils into French gold, which is being treasured up for him in France. His future father-in-law, M. O'Gorman, has seen to that."

"His future father-in-law?" she said, and stared at him round-eyed, with parted lips. Then added, "M. O'Gorman? The Governor of Tortuga?"
"The same. You didn't know?"
She shook her head without replying. After a moment she spoke, her voice steady and perfectly controlled. "But surely, if this were true, there would have been an end to his piracy by now. If he... if he loved a woman and was betrothed, and was so rich as you say, surely he would have abandoned this desperate life, and—"

"Why, so I thought," his lordship interrupted, "until I had the explanation. O'Gorman is avaricious for himself and for his child. And as for the girl, the girl she's a wild slave! It suits for such a man as Blood. Alas! I marvel that he doesn't marry her and take her availing with him. It would be no new experience for her. And I marvel too, at Blood's patience. He killed a man to win her."

"He killed a man for her, do you say?" There was horror now in her voice.
"Yes—a French buccaner named Levasseur. He was the girl's lover, and Blood's associate. Blood coerced the girl, and killed Levasseur to win her. Pahl! It was a wondrous tale, I own. But men live by different codes out in these parts."

(To be continued)

The last census reported a total of more than 5,000 bookkeepers in the United States.

Dog Heroes of the Alps
St. Bernard. Trained to Find People Lost in Mountains.
The hospice of St. Bernard, situated over eight thousand feet high in the Alps, can boast that it is one of the oldest and most interesting institutions of its kind in the world. It was founded in A.D. 925 by a nobleman named Bernard de Menthon, who wished to give shelter to pilgrims making their way across the Alps to Rome.

But in the minds of most people the hospice is mainly remarkable for its dogs and for the wonderful deeds they have performed in saving the lives of missing travellers. An average number of twenty St. Bernards is kept in the hospice kennels, and each is trained in the task of searching for persons lost in the mountains. Having found them, the animals afford them aid in the form of a flask of wine and then guide them to the hospice or go forth help.

One of the most wonderful of the dogs attached to the monastery was Barry, to whom a monument stands in the courtyard of the hospice, with the inscription: "Barry, the heroic, saviour of the lives of forty persons and killed by the forty-first." The manner of this canine hero's death is unknown, but it was believed to be a case of mistaken identity.

Find Traces of Mammoths

Famous English Cricket Field Was Once Hunting Ground.
Mammoths used to fight and play at the Oval (the famous cricket ground in Kensington, London), 10,000 years ago in the ice-age before the cricket ground was made. The shoulderblade of one of these immense woolly elephants was unearthed by workmen while excavating near the Belgrave Hospital for Children, Clapham Road. The bone, which is fan-shaped and measures 3 ft. 4 in. by 2 ft. 5 in., was taken charge of by the secretary of the hospital. He at once communicated with the authorities of the National History Museum, who inspected the find, and declared that it belonged to one of the mammoths which used to make the Thames Valley their hunting ground.

Find Ancient Roman Relics

Interesting Discovery of Roman Occupation is Unearthed in Britain.
Ten thousand Roman coins, pottery, jewelry and two stone slabs have been unearthed at Richborough Castle at Sandwich, county of Kent, Eng. Most of the coins are copper. Among the relics of the Roman occupation found were stone slabs bearing many straight lines across their faces, and forming small squares between the lines.

Walter Klein, the excavator, thinks the slabs were used in games played by Roman soldiers. "They resemble wolf puzzles," he said.

Wolf Attracted By Radio

Music Lured Animal to Clearing Where It Was Shot.
Lured from forest fastness by the seductive strains of radio music, a large timber wolf fell prey to the gun of Thomas Hangerford at Fox Point, Ont. The animal wandered into the yard of Joseph Tapley and stood by a radio aerial pole, bewitched by the music from a Buffalo broadcasting station, when Mr. Tapley telephoned Mr. Hangerford to get his gun. When the latter approached, the prowler made for the thicket, but before it could escape, a well-directed bullet laid it low.

Will Use Radio

For the first time in its history the Canadian Manufacturers' Association will use radio in a campaign when E. W. Stewart, chairman of the committee in charge, and Joseph Benham, vice-chairman, will broadcast "Produced in Canada" addresses from station CKAC, Montreal.

Mrs. Oscar Simkins, the only woman to become a graduate detective on the New York police force has retired after serving 25 years.

Bad Boy
Teacher: "Jimmy, if I said, 'I am beautiful,' when I went to bed, would you be a good boy and tell me?"
Jimmy (promptly): "Past tense."

Interesting Peace Ceremony

Dyke of Dutch East Indies End Inter-Tribal Feud.
Dispatches from Borneo, Dutch East Indies, give interesting details of a peace ceremony between the different Dyak tribes of that island. These clans have been constantly fighting each other for years, and have the reputation of being ferocious and bloodthirsty head-hunters.
Some 4,000 Dyaks came to the gathering. There were present also a few Dutch and British officers, who witnessed curious war dances, songs and prayers by medicine men. Finally the head priest killed a pig by a divinatory method and sprinkled its blood over the multitude, pronouncing a terrible curse upon anyone who should presume to revive the inter-tribal quarrels.

An Interesting Discovery

Geologist Finds Water in Crystal Ten Million Years Old.
Clear and sparkling as though they might have just bubbled from a spring, drops of water more than 10,000,000 years old have been found by O. C. Ferguson, head of the geology department of the field museum of natural history. They were imprisoned in crystal quartz picked up from rock formations in Brazil. The estimate of the age is based on the character of the rock, which belongs to a period that some scientists declare, nourished over 500,000,000 years ago—Popular Mechanics.

Notwithstanding all the arguments that have taken place, very few debatable questions have been answered.

An Interesting Idea

Right Foods Mean Few Visits to the Dentist.
The Child Health Magazine published an article recently in which this sentence was used:
"One can be what one chews to be."
Isn't this an interesting idea? It makes a strong appeal to us to select foods which have to be chewed so that our teeth will be stimulated and strengthened. It subtly conveys the thought that right foods mean no toothaches or carities, and few visits to the dentist.

WORLD HAPPENINGS BRIEFLY TOLD

Jaocob Gould Schurman, now United States minister to China, has been named by President Coolidge as ambassador to Germany.

The Canadian Pacific Railway hauled 9,815,000 tons of grain to Fort William and Port Arthur during 1924, and 967,500 tons to the port of Vancouver in the same year.

Eamon de Valera, the Irish Republican leader, issued a rhetorical St. Patrick's Day manifesto to Irishmen abroad, appealing to them to rally to the aid of their "throneless country."

Daylight saving will come into force in Montreal on May 3 this year and will cease on September 27, according to a motion carried in the city council.

All the way from East Africa, 9,000 miles, a native brought a sample of hog blood containing a dread animal disease, to the department of agriculture, Washington, for experimentation purposes.

A new service by direct cable between Rome and New York, over which it is hoped to transmit cable five times faster than hitherto, was successfully inaugurated. Total length of new line is 5,422 land miles.

Hon. George P. Graham, minister of railways and canals, stated in the House of Commons that 1,936 miles of rural road were constructed or improved under the Canada Highways' Act in 1924.

On the heels of the sharp controversy over the value of aeroplanes, the United States war department has ordered a fleet of 100 new observation and pursuit planes, the cost of which will total nearly \$1,500,000.

"Rub It In for Lame Back."—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain recedes and there are ample grounds for saying that it is an excellent article.

Alberta and B.C. Press Association The Alberta Press Association executive met in Edmonton and fixed the dates of the annual meeting as August 28 and 29, at Edmonton. The British Columbia Press Association will meet at the same time, also in Edmonton.

Mrs. Laura Henderson

Sarnia, Ont.—"In young motherhood Dr. Pierce's Favorite Prescription has been of great benefit to me as a tonic and nerve. Whenever I feel in a rundown, nervous condition, a bottle of the 'Prescription' tones up my entire system quicker than any other medicine I have ever taken and it keeps me well. I heartily recommend this medicine to women who are in a debilitated condition. It is a safe and reliable tonic and nerve, always dependable."—Mrs. Laura Henderson, 224 Cottetery St.

Health is most important to every mother. You cannot afford to neglect the quantity of Canadian wheat supplied to the United Kingdom in 1924, amounting to 160 per cent. over 1923, according to a report of the department of trade and commerce.

Dairy Convention For Winnipeg

Arrangements Made For 1926 Meeting Says Manitoba Dairy Inspector. Mr. L. A. Gibson, provincial dairy inspector for Manitoba, recently announced that arrangements have been completed for the holding of the 1926 annual convention of the Western Canada Dairy Association in Winnipeg. Executives of the Manitoba Dairy Association and of the Manitoba Milk Producers' Association met to discuss on the dates of the convention, and also to decide upon various competitions of the provincial organizations for the ensuing year. During the past year, 139 carloads of creamery butter were shipped out of the province of Manitoba, a total of 4,435,300 pounds valued at \$1,462,516. The shipments included 29,600 boxes of unskated butter that were shipped to the British market, the first time that Manitoba has shipped unskated butter to this market.

"DIAMOND DYE" IT A BEAUTIFUL COLOR

Perfect home dyeing and tinting guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil dye rich, permanent colors. Each box contains 15-cent package containing directions on simple any woman can dye, or tint lingerie, silks, ribbons, hats, waists, dresses, coats, stockings, sweaters, trousers, coverings, hangings, everything new.

Buy "Diamond Dye"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

A Woman Car Distributor

Miss Lucy Wright Has Responsible Position With U.S. Railroad. Miss Wright must know crops and crop conditions. A great wheat harvest means a shifting of freight cars and in the same manner an unusual orange yield in California influences the routine of office. An early spring or a late fall affects the demand for freight cars and the unpredictable cold weather in many parts of the east brings new problems.

Miss Lucy Wright, general car distributor of the Grand Trunk Railway, said she is the only woman in the United States occupying the position that carries with it a demand for great executive ability. It is her duty to keep on the move—thousands of freight cars and to meet promptly the demands of shippers. As the freight car costs the railroad a dollar a day and Miss Wright has 15,000 cars in division which must be always employed unless heavy losses are carried.

Americans Dance To Music From London

Radio Programme Picked Up By New York Successfully Re-broadcast. The first radio programme of London dance music to be successfully re-broadcast to a large American audience, has been sent out from Station WJZ, New York City, and WRC, Washington.

The music of the Hotel Savor, London, dance orchestra, picked up by the United States stations, and re-broadcast on a different wave length by the Radio Corporation of America. The radio audience also heard the chimes of "Big Ben" on the clock tower of the House of Parliament strike the hour of midnight.

Increase In Hog Production

Hogs to the number of 3,040,000 were marketed at the stockyards and packing plants of Canada during the year 1924, as compared with 2,500,000 in 1923. The greatest amount of increase was in the prairie provinces for in 1923 there were marketed in those places 698,000 hogs, and in 1924, 1,065,511, or a 50 per cent. increase.

Hard and soft coars both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

What Goes to United Kingdom. There was a heavy increase in the quantity of Canadian wheat supplied to the United Kingdom in 1924, amounting to 160 per cent. over 1923, according to a report of the department of trade and commerce.

Children of Mature Parentage. Scientists say that the child of a father over fifty years of age has ten times as good a chance of becoming eminent as he would if his father were a young man.

Hope Of The World

Viscount Cecil, of Chelwood, who declared in a recent speech that the only apparent hope for the survival of Christ in this civilization lay in nations preparing to co-operate and to shoulder their share of the burden of safeguarding the peace of the world.

Definite Boundary Line

No Dispute Between Canada and U.S. Regarding Territory. The frontier between Canada and the United States reported to be the United States senate recently, are those signed on February 24, in Washington, by Hon. Ernest Lapointe and Secretary of State Hughes.

The one dealing with the demarcation of the boundaries realigns in Pasmaguddy Bay, N.B., and also provides for a "more practical definition of the boundary line" which runs through the Lake of the Woods to a point described as the northwest point of that lake.

It also provides for the relocation and repair of lost monuments which mark the boundary line between Western Canada and the United States. It provides that the western boundary shall consist of a series of right or straight lines adjoining adjacent monuments as now established or re-established.

No territory is actually in dispute, the Lake of the Woods adjustment being chiefly designed to give more practical definition of the two small areas of United States waters in the Lake of the Woods, which under the present demarcation is entirely surrounded by Canadian waters.

The New Brunswick adjustment concerns "a small zone of waters of considerable jurisdiction in Grand Manan Channel."

The treaty also provides for inspection from time to time of the boundary line between Canada and the United States, for the repair of damaged monuments and buoys, the keeping open of both the vistas and the general maintenance of an effective boundary line.

Demonstration Farm For Russia

Will Be Equipped With Modern Machinery and Implements. Seven groups of Russian farmers, who have lived for a time in the United States, left New York recently under the direction and organization of the Technical Aid Society to establish modern farms in Russia. These will serve as demonstration farms for the Russian peasants. All these groups have equipped themselves with modern machinery and implements.

These groups were sent by the Technical Aid Society to settle in communes in Soviet Russia.

HEART TROUBLE SHORTNESS OF BREATH

Mrs. Geo. E. Bowman, Morrisburg, Ont., writes:—"I am writing you a few lines to let you know of my experience with Milburn's Heart and Nerve Pills. Two years ago I became very poorly with my heart and nerves and wherever I took the least little bit of exercise my heart would start to jump and flutter. I could not walk upstairs without having to sit down and rest before I was half-way up, on account of my breath becoming so short. I commenced taking

MILBURN'S HEART AND NERVE PILLS and in no time I felt a great improvement, and can now heartily recommend them to all those who are troubled with any affection of the heart."

Dr. E. & N. Pills are for sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Good Season For Lumbering

Conditions Have Been Very Favorable In Thunder Bay District. Winter lumbering in the Thunder Bay district will show better returns to operators this year than for several seasons. The conditions have been exceptionally good. Fine weather has prevailed in the woods since the cut was started late last fall. It is estimated that close to sixty per cent. of the total winter cut will be used for home manufacture, while 40 per cent. will be rafted for export to the United States mills.

Earthquake Shocks

Not a day passes without earthquake shocks occurring in some part of the globe. Japan averages something like three every twenty-four hours.

Suffered Misery With Itchy Eczema Cuticura Healed

"I was troubled with eczema for over two years. At first it appeared in small spots and then began to spread all over my body. I had used many remedies but I suffered with itching and burning. The itching and burning were terrible. At times I was obliged to give up my work. I was treated and tried different ointments without any benefit. I read an advertisement for Cuticura Soap and Ointment and decided to try them. After the first application, relief. I continued the treatment for a time and now I am healed." (Signed) Miss W. Wood, 110 City Hall Ave., Montreal, Quebec.

Cuticura Soap, Ointment and Tablets are ideal for daily toilet use. They are sold by all druggists and dealers. Write for free literature. Cuticura Soap and Ointment, 110 City Hall Ave., Montreal, Quebec.

Accepts Chairmanship. Canada is interested in the announcement from London, England, that Sir Halford Mackinder has accepted the chairmanship of the Imperial Economic Committee, which is to decide how the \$5,000,000 a year which the British government has set aside to encourage the marketing of Dominion products in the United Kingdom, should be spent.

Germany's Drink Bill

Has Doubtful Distinction of Being Wettest Country in the World. Prohibition would pay the German war debt and have millions of gold marks to subsidize a grape juice industry, according to Germany's national committee for prohibition.

Germany is the wettest country in the world. The committee announced this, following a survey which disclosed that Germans drank just a sip or two less than two quarts of alcoholic beverage for every quart consumed in France. The annual German consumption is 500,000,000 quarts, of which 132,000,000 quarts are of hard liquor—brandy, liqueurs and the like. France consumes 200,000,000 quarts of intoxicating beverages annually. If the red wine, as served in every French home and restaurant, can be kept intoxicating, more than 20,000,000 gold marks, or approximately \$500,000,000, is the bill for hard liquor that Germany daily pays to pay each year. For his wine, beer and liqueurs each German is said by the committee to spend forty gold marks, or \$10 annually. That is the per capita bill, with each man, woman and child charged with his average obligation.

"Since the burden imposed on Germany by the Dawes plan amounts to forty marks per capita," the committee sets forth, "Germany may easily win their freedom by cutting out booze."

"Germany leads the world," the committee sarcastically asserts, and then presents figures showing that the leadership is in the consumption of alcohol.

Record Of British Fleet

Made Trip of 17,000 Miles With No Breakdown. Seventeen thousand miles from London to India and back, including a flight round Mount Everest, with a single breakdown and without change of engine, is the record flight which Alan Cobham, a British airman, has just been making Air Service Marshal Sir Sifton Branker on a survey of the Imperial air routes through Bagdad, Calcutta and Rangoon. Cobham's total flying distance for himself now exceeds two hundred thousand miles.

The trip was most remarkable, that the famous world flight of the American airman, because Cobham had no assistance from elaborate dumps at convenient stations and he carried all the spares necessary in case of mishap by his machine.

Sir Sifton Branker carried with him in the machine baggage for a three months' trip, including clothes for diplomatic functions. As a result of the trip, it is now considered that it would be possible to fly to India in four days next year, while the air marshal will now be able to elaborate the whole scheme of Imperial airways throughout the empire to India, Australia, Egypt and Canada.

MOTHERS PRAISE BABY'S OWN TABLETS

Mrs. L. M. Brown, Watton, N.S., says: "I cannot recommend Baby's Own Tablets enough. I have found them invaluable for the ailments of little ones." Mrs. Brown's testimony, that she has used thousands of other mothers who have used the Tablets. To use them once is a sure guarantee that they will always be kept in the home as long as there are babies or young children to be cared for.

Baby's Own Tablets are a laxative—mild but thorough in action—never harsh to regulate the stomach and bowels; relieve constipation and in digestion; break up colds and simple fevers and make the dreaded teething period easy. In fact they banish all the minor ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Saved Empire Exhibition

Duke of Devonshire Guaranteed Five Times As Much As Government. A. M. Samuel, parliamentary secretary of the overseas trade department, has officially revealed the fact that the Duke of Devonshire saved the empire exhibition in the early days, saying: "The government first of all guaranteed \$100,000, but at a later date the Duke of Devonshire guaranteed \$500,000 out of his own private expenditure. Had he not done so, the exhibition would have shut up there and there." The government, he added, had very properly taken over that guarantee and ratified it.

Expert Record Tourist Trade

According to estimates by officials of Montreal steamship companies, more than 40,000 tourists, the largest number on record, will sail from Montreal for Europe during the coming season of navigation. They will include a larger number of United States citizens than ever before.

SUNDAY SCHOOL LESSON

MARCH 29

REVIEW—CLOSING PERIOD OF CHRIST'S MINISTRY

Golden Text: Jesus Christ is the meek and lowly yet, yet for ever. Hebrews 13:8. Devotional Reading: Revelation 1:9-13.

Loyalty to Christ the King: Lesson 1.—The last Sunday of his earthly life, Jesus Christ, as the prophet Zechariah had foretold, made his triumphal entry into Jerusalem, meek and riding upon an ass. The whole city was moved. The people acclaimed Him King, though they did not really recognize what that kingship meant. The Romans expected some public rising; the Pharisees, that Jesus would claim the throne of David and return to Bethany for the night. He did no wonderful work. He had no revolt against the Roman rulers, the enthusiasm of the country people and the curiosity of the city folk soon waned. Before the week was over the cry of "Blessed is the King!" was changed to "Crucify Him!"

Exchanging loyalty to Christ is the mark of all his true followers. Loyalty to the right is grounded on the personal loyalty to Him who is wholly righteous. "Christ was for a long time my King," said an earnest follower of His, "but I fear He was only a constitutional sovereign and I was His prime minister. Now He is absolute Lord and I have no more of a difference in my life."

Miller's True Powder acts so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found in healthy condition, strengthening the infantile stomach and maintaining it in vigorous operation, so that besides being an effective vermifuge, they are tonic and health-giving in their effects.

Murders In Russia

Newspaper Correspondents Are Slain By the Peasantry. Recurring murders throughout Russia of rural newspaper correspondents by the peasantry are giving the government great anxiety, and the severest suppressive measures are being taken against the assassins. At Nikolayev, near Odessa, three peasants were executed for killing the correspondents of a provincial paper, whom the peasantry accused of acting as a spy for the government. Scarcely were the three convicted men dead at Brianov, near Moscow, another country correspondent, whose duty it was to report on political and other conditions among the peasantry, was slain by unknown persons.

Hardly a day passes without similar occurrences in the country districts. According to the government's own figures, more than 1,000 such correspondents were murdered by the peasantry last year.

Sale of Coal in National Parks

The regulations governing the licensing of businesses, trades, or occupations within Canadian national parks were amended by order in council dated February 5, 1925, so that every person selling coal by weight within the parks shall have all coal sold in quantities or loads of one thousand (1,000) pounds each or over, weighed on the scales maintained by the department for the use of the public. The fee for weighing coal shall be fifteen (15) cents per load.

Have Laugh On Robbers

Shopkeepers at Bath, Ont., have had the laugh on robbers recently. One gang of burglars cut a hole in a tobacconist's window and stole a lot of packets—all dummies and empty. In robbing a wine merchant's store they stole five bottles of colored wine.

THE WEEKLY NEWSPAPER

That the small town weekly newspaper is coming into its own and is gradually being recognised as the popular medium for good and wholesome news as well as advantageous advertising is evidenced by the growing admissions of some of the large city dailies who are adopting the town weeklies practice of introducing in their columns more of the "pleasant and personal" elements in an endeavor to overcome the "blood and thunder" elements which are the feature items of the first pages of their daily issues. The Seattle Star is one of the large newspapers to initiate this service and attributes the origin of the idea to the small town weekly. Dr. Suzzallo, president of the University of Washington, states that "the youth of the country cannot be taught in the public schools the ideals necessary for the preservation of the government; our schools do not hold the youth of the country long enough to exert upon them this needed influence. This work is to be done by the one great moulder of public opinion, the country newspaper, which is unique in this field." The editor of the small town weeklies are thus experiencing the satisfaction of seeing their policies of clean news of general, personal and local interest, being recognized and gradually adopted by the large city dailies, in an effort to make their publications more popular and their circulation larger. The telegraphic columns of many large dailies, depicting as they do, the horrible and blood-curdling events of the day's doings throughout the world, is anything but elevating to the younger minds of the country, and instills in them the desires for adventure along unworthy lines. It looks as if the millennium, in this respect, has been reached and that from now onward, a return to sane, clean and readable news will be the result, with thanks to the ever continued policies of the Country Town Weeklies.—Ex.

BOOTS AND MEN

Boots go on feet; so do men,
Boots sometimes get tight; so do men,
A boot will shine if polished; so will a man,
A boot to get on needs a pull; so does a man,
Some boots have red tops; so have some men,
Some boots lose their soles; so do some men,
Some boots are imitation calf; so are some men,
Boots are tanned; so are men—mostly in their youth,
Some boots can't stand water; neither can some men,
When a boot is well soaked it is a hard case; so is a man,
A boot when old gets wrinkled and hard; so does a man,
A boot to be of much account must have a mate; so must a man,
A boot when well healed always feels comfortable; so does a man,
The less understanding there is in a boot the bigger it feels; so it is with man.—Parkhill Gazette.

A friend subscriber of ours, writing from England, remarks: "I positively could not do without The Blairmore Enterprise. I can keep myself well posted on the doings of our little town and am looking forward to again some-day pay a visit. It is no use talking, but my thoughts will stray back to the old town and the country where I spent the greater part of my life."

WOULD EXPORT CAVIAR FROM BRITISH COLUMBIA

A number of Russians who recently arrived in British Columbia by way of Manchuria, are negotiating for the establishment of a caviar industry on the Pacific coast. They were much surprised that the by-products possibilities of the fisheries in the coast province had not been developed, stating that, if they were, competition with other countries could be shut out and foreign trade extended.

RUSSIAN REDS COME TO AID OF N.S. MINERS

SYDNEY, N.S., Mar. 21.—An extra edition of the Maritime Labor Herald, issued last night, carries the announcement of the receipt by the editor, J. B. MacLachlan, of a donation of \$5,000 from the R.L.U. and the All Russian Miners' Union, toward the relief of the destitute miners of Cape Breton.

The R.L.U. is apparently Red International Labor Union.

Echo Answers

If a freight train at a crossing
Hits an auto fair and square,
There's the freight train—Where's the auto?

Echo answers, "Where?"
—Boston Transcript

"Bridget? Didn't I hear you quarreling with the milkman this morning?"

"Ye did not, ma'am. I enquired for the health of a milkmaid at the dairy, who's ill."

"Yes, and—"
"Says I, 'How's the milkmaid?' An' he got in a temper o' fury, an' said, 'That's a thrade secret.'"

Prepared for Christmas

A Highland minister came to a lonely house on the margin of his parish to baptize the child of a shepherd who lived there.

"Are ye prepared?" he asked.
"Aye," said the shepherd, "I got a grand ham, ye ken, for yer dinner."

"No, no," said the minister, "I mean spiritually prepared."

"Aye, aye, meenister. I got a quart jar frae the lan."

Independent of The Ark

A number of gentlemen in a hotel were discussing as to which country was the oldest, when a waiter, a genial old Irishman, entered the room. One of the gentlemen spoke to him of their discussion, and asked his opinion. The waiter, of course, said old Ireland was the oldest.

"How is it then, there's no record of any of you being in the ark with Noah?"

"Oh, sure, Ireland was always an independent nation," said the Irishman, "she had boats of her own."

The Enterprise, Blairmore

ORDERS EXECUTED DAILY

THE TEN COMMANDMENTS OF THE MAIL ORDER HOUSE

- 1 You shall sell your farm produce for cash, where you can, for we buy nothing from you.
- 2 You shall believe in us and trust us; but we do not know you and have no confidence in you.
- 3 You shall send your money to us in advance, so we can buy the goods from the factory with your money. You may have to wait a few weeks; but that is our business method.
- 4 You shall get help from your nearest city or village to build good

roads, so you may easily haul our goods from the depot; but do not ask help from us—we don't help to build good roads.

5 You may buy church bells and altar utensils from us, and send the money in advance—that's the rule.

6 You shall get all the help you can from the business men in your neighborhood. Although we may have more profit from you than they have it is against our rules to give to your churches.

7 You shall convert your neighbors also to your faith in us, for we have room for more money.

8 You shall look at the pretty pictures in our catalogue as often as you can, so as to strengthen your desire for things you do not need, but which you may order with other goods to save freight. Send us all your ready cash so that you may not have any left to buy necessities from your

home dealers.

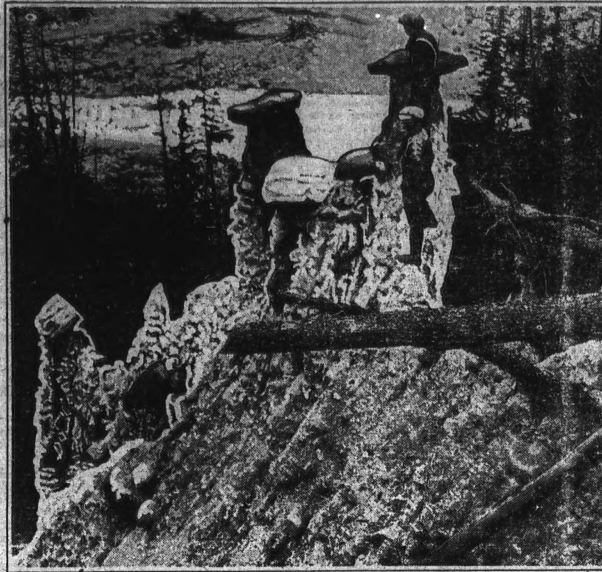

9 You shall believe in us rather than your home business men, for we want your trade. We get to be millionaires on your support. Don't be lulled.

10 You shall call on the business people of your vicinity for help and

credit if you meet with hard luck or sickness. It's your money we want; we don't want you unless your orders are accompanied by cash.

That so-called "weekly dose" of \$3.00 could be rightly called a weekly dose.

WHERE A MISSTEP MIGHT MEAN DEATH

THE Hoodoos on the Cavell Motor Highway, Jasper National Park, curious stone-figures brought into being by the erosion of the earth under the constant wearing effects of air and water, draw exclamations of wonder from thousands of tourists who visit the largest of Canada's National Parks every year.

Huge flat stones, balanced as hats, atop the pinnacles of earth which have stood up firmly when the mountain side all around them crumbled or was washed away by the rushing waters, seem as though

the slightest breath of wind would be sufficient to send them hurtling to the bottom of the valley hundreds of feet below. A favorite sport with the tourist is to drop large stones on the hoodoos and see them sway back and forth drunkenly, yet finally regain their poise and remain balanced as firmly as before.

The tourist in the photograph who was bold enough to scramble down and use one of the flat stones for a table on which to rest his arms, had a strenuous climb be-

fore he again regained the level surface of the Cavell Highway, which winds up from the Athabasca Valley almost to the foot of the glacier of the Ghost, that peculiar age-old formation of ice and snow which hangs on the wide stretches of Mount Edith Cavell.

Visitors to Jasper Park Lodge may travel by motor or saddle horse from the Lodge to the foot of Mount Cavell or any of the other mountains surrounding the lake cabin holiday of the Canadian National Railways.

"My Greatest Thrill In Sport"

Being an Account of an Adventure, Which Overtook Ozark Ripley On the Nipigon.

OZARK RIPLEY to me this summer in July on the Nipigon River in the rapids just below the Canadian Pacific bridge at Nipigon, Ont.

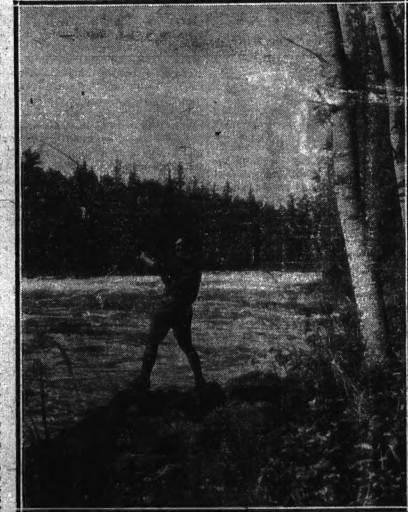

It all happened late in the evening. The trout at this point are the most famed and largest brook trout in the world. But just at that time they were not striking as usual on account of the exceedingly cold night. However, I decided to go to the river to try out a little split bamboo bait casting rod, 2 1/2 ounces, that I had made for casting very light lures. It would be a revelation to myself and other anglers to take trout in this manner, when fly casting is the vogue.

The water under the Canadian Pacific bridge, and a quarter of a mile at least, flows like a millrace. I attached to my line a small weighted feather casting minnow, just to see if the little rod would shoot it. At the first try I shot the lure at least 125 feet across the water toward the west bank and in the opposite edge of fast water.

The very instant that the tiny lure struck the water the second of the only two large rainbow trout that up to then had ever been taken out of the Nipigon rose and seized my lure. He was a monster. It seemed an impossible accomplishment to land that fish with the little rod and the fine nine-pound test casting line. The thrill that came in that approach was incredible. The tilting of muscles and grizzly bear was tame in comparison.

I worked in a bad light nearly an hour, and in danger of falling into that deep, swift rushing water that lead that fish out of the fast water where the current would not aid it into the long upstream swirl on my side. The only thing that helped me in that fight was the generous supply of fillet line I had in store on my reel to help perfect tumbling of it.

I worked up and down those rapids in despair and hope, and as the whims of the strong leaping fish

"It seemed an impossible accomplishment ever to land that fish."

directed. Yet the thrill of trying to land that whooper leaping rainbow with that tiny rod was something I had never conceived possible.

It began to grow darker. Suddenly on the left bank I saw a big black bear take to the water and swim deliberately toward my fish, despite that terrible current. Evidently he took it for a cripple. Right off, that rainbow sensed his presence and darted for the east bank as fast as I could reel in slack, and the bear kept his course direct for him.

The rainbow heading straight for the upstream water, with occasional leaps from it, finally gained the stretch of upstream current, with the bear only a few yards behind him.

That bear did not become apprised of my presence until he made a lunge for the fish, missed it as it leaped out of the water, and then scrambled for the bank to get a better survey of his expected prey. That very moment he got a whiff of the man scent, wheeled and scrambled as fast as he could for the thicket of spruce along the shore hillside.

And then the thrill of thrills occurred in the darkness as I roughed that stout rainbow, and brought him along the course, narrow sand bank where, as he was far too large for my landing net, I fell on top of him and held him captive with my hands and knees until his strength was entirely exhausted.—New York World.

Here and There

Southern Alberta is to have another addition to its growing list of titled ranchers, according to reports. The Duc de Nemours, a descendant of Louis Philippe of France, it is stated, is sailing in April to visit Lord and Lady Rodney, who have a ranch at Fort Saskatchewan and, later, to acquire a homestead near the establishment of the Prince of Wales.

The Nova Scotia Technical College assays under direction of the Dominion Council of Scientific Research indicate Nova Scotia's oil shales to be the richest in the world, giving fifty gallons of high-grade paraffin to a ton of shale. One hundred million tons of the shale are readily accessible, and vast oil industries similar to those of Colorado and the Western States might well come into being in this province.

"I find general business conditions quiet but improving throughout Canada and undoubtedly the increase in the price of farm products will prove very encouraging to the west," said Grant Hall, vice-president of the Canadian Pacific Railway, on his return from a recent tour of the Dominion. "Large orders for hardware shipped over our lines of late to the west indicate that the crop money is now beginning to circulate more readily, which in its turn is a mark of the farmer's confidence in the country."

There was a general increase in all phases of the lumbering industry in Canada during 1923, as compared with the previous year, according to the latest report of the Dominion Bureau of Statistics. The average value of the output in that year amounted to \$129,646,077, as compared with \$114,824,630 in 1922, an increase of 22.4 per cent. In this respect the lumbering industry comes third on the list of manufacturing industries in Canada, with the pulp and paper industry first, and the flour and grist mills second.

Passengers aboard the Canadian Pacific steamship "Empress of France," now touring the world, had a unique experience recently while visiting Ceylon. Returning from a run-out to Kandy, the old capital of the Cingalese Kings and Site of the Temple of the Tooth of Buddha, a technician of the travellers was held up by a herd of wild elephants which, hemmed in on either side by the jungle, ambulated along the track ahead. This was a feature of the journey which delighted those of the tourists who were not anxious about missing the ship.

Viola Dana, the famous motion picture actress, whose work has delighted millions, is to be the star of a drama to be filmed at Banff, according to a recent report. Miss Dana journeyed from New York to Montreal and then across the continent via Canadian Pacific Railway, in order to join her company for the film. The remainder of the cast are proceeding to Banff from Los Angeles and it is expected that shooting of the scenes will commence shortly. A very considerable number of big pictures have already been taken at Banff, which seems to have a great attraction for discerning stars and directors who appreciate the beauty of the scenery.

Information furnished by J. Frank Calbreth, packing contractor and general merchant, shows that during the 1924 hunting season, parties secured 12 moose, 28 caribou, 24 goat, 31 sheep, 18 black bear and 11 grizzlies in the Telegraph Creek district of British Columbia. Of the caribou, the largest, shot by J. J. Sartori, of Brooklyn, N.Y., has a spread of 47 inches, is 39 1/2 inches long and has 37 points. The largest sheep horns were 41 1/2 inches long, with a spread of 31 inches, and were secured by A. D. Stewart, of New York.

The third annual Eastern International Dog Sled Derby, run off at Quebec on February 19, 20 and 21, was a tremendous success. Twenty-two mushers and their teams from many parts of Canada and the United States competed over the 100-mile course, the race being won by Emilie Ben Gerson of Le Pas, Man., who also won this year's derby at that place. The last day's lap was run through a blinding snowstorm, which gave the thousands of sports visitors from Canada and the United States who witnessed it, a vivid impression of normal conditions experienced by those who have sufficient.

The government proposes to nullify immigration by placing a ban on eggs.

Spendthrift Dominions

There is probably no other country which so lightly regards the rights of the future as our own Australia. To fear something out of the continent and then to offer to others for its present cash value has become the ruling principle. After nearly a century and a half of white settlement, the year 1925 finds us still largely hewers of wood and drawers of water for other people.—Sydney Bulletin.

Fitting Cruiser For South African Trip

Getting Repulse Ready For Prince Is Proving Difficult Problem

The fitting of the battle cruiser Repulse for the Prince of Wales' trip to South Africa and South America is proving a difficult problem, the London Daily Mail says.

In addition to the usual complement of 1,350 men, room has to be found for the Prince's staff and servants, numbering more than 90 and the fact that so many oceans, climates and conditions must be provided for, necessitated space for an immense amount of baggage, totalling about 500 trunks, 200 chests and other cases.

One difficulty, the paper says, is that the Repulse is not equipped with a laundry and that therefore a great stock of handkerchiefs must be taken on, as none can be freshened until Capetown is reached.

Some of the preparations have to do with the entertainments at which the Prince will be host, aboard ship, upon his arrival at various ports. Twenty-one cooks, stewards and waiters will accompany the party and sufficient table ware will be taken to serve 900 guests.

To take refuge in the town. The Spaniards secured themselves in the fort.

With a devil's luck and clear headed thinking, Captain Blood, flinted with preparations for a land attack after he had managed to secure a large ransom in gold from the Governor of Maracaybo, and, opening a broadside, put the fort in flames. Captain Blood sailed

Perhaps you are using good tea. We think "Red Rose" extra good. Won't you try it?

RED ROSE TEA "is good tea"

The same good tea for 30 years.

A Winning Fight

In promoting health and combatting disease the great majority of people will readily admit the old adage holds true and that an ounce of prevention is worth a pound of cure. The trouble is that while government, they do not always act upon their belief and live up to it. If they did there would be far less sickness and disease; fewer deaths and enormously less physical suffering, all of which would result directly in great financial gain to the State and to the individual citizen, and largely increase the productive power and prosperity of the world.

Again, while people generally agree that prevention is better and cheaper than cure, whether it be in the matter of health or fire, or war, the vast majority remain rather hazy on the subject, with the result that they are critical of expenditures necessary to the taking of preventive measures, but at the same time are quite prompt in spending money to cope with a crisis when one is precipitated but which could have been prevented by foresight and a much smaller expenditure.

Let us always epidemic of disease break out and begin sweeping through a community and the people will stop at no outlay of money to check it, although they may have year after year refused to vote a comparatively small sum which would have removed the menace which finally caused the epidemic. There was hardly any criticism in Canada over the piling up of a war debt of two billions of dollars, but there is now criticism of an annual expenditure of the administration of the League of Nations in its endeavor to prevent future wars by removing cause for them.

It is necessary, therefore, to bring to the attention of all people as frequently as possible the decided benefits to themselves resulting from the taking of proper measures of prevention as individuals and as represented by Governments, Federal, Provincial and Municipal. It is in the interest of all that attention is drawn to this article to some remarkable advances made in recent years in the scientific prevention of disease.

Take smallpox as an example. There was a time when the memory of many people when this disease was quite common and the death toll very high. In the city of Montreal in 1835 smallpox was the cause of 3,164 deaths that year, but the costly lesson of that epidemic resulted in general vaccination throughout Quebec with the result that there has been no repetition of the epidemic. On the other hand, vaccination was largely neglected in the Windsor district of Ontario with the result that last year an epidemic in virulent form developed, and of those who contracted the disease and had not been vaccinated 71 per cent. died. On the other hand not one single death occurred in the case of a person who had ever been vaccinated. The epidemic was quickly controlled by the vaccination of practically the whole community, 50,000 people submitting to vaccination in two weeks. Vaccination is prevention of smallpox, yet in the face of established facts many people neglect to have their children made immune and some even viciously object to it.

Consider diphtheria, once a dread disease, and still all too prevalent because of neglect of proper precautions. Given antitoxin at the first indication of the disease and the chance are all in favor of a mild type of the disease and recovery of the patient. But better still is to immunize all children with toxin antitoxin so they will not contract diphtheria, and it has been positively established that through toxin antitoxin children are protected against diphtheria.

Or consider typhoid. Since 1900, typhoid fever, once so prevalent in North America, has been reduced by an average of 71 per cent. This was accomplished almost entirely by human intervention, by studying the cause of typhoid fever and then destroying it by what the Minister of Public Health for Saskatchewan has described as, fire-proofing the individual against it. The total abolition of typhoid is quite definitely in sight if individuals and communities will only take full advantage of the preventive means now available to all. Already in Saskatchewan typhoid has disappeared from the list of fifteen diseases causing the greatest mortality.

The Great War taught the world one great and invaluable lesson. For the first time in history huge armies, unparalleled in numbers, were practically free from those two old army diseases, typhoid and smallpox, which formerly killed thousands. The compulsory use of methods of inoculation in the army have left objects to vaccination and inoculation without an argument. Tuberculosis, the dread great white plague, is also being overcome through education and the application of proper methods. The death rate is steadily decreasing. The betterment is being brought about, not through cures, but by prevention. Today the three Prairie Provinces have the lowest death rate from tuberculosis of all the Provinces.

It is the total banishment of these diseases merely an Utopian dream. An eminent public health man draws attention to the fact that leprosy has disappeared from the ordinary life of Europe, whereas 600 years ago, with one-tenth the population of today, Europe had 19,000 houses of refuge for the innumerable lepers of that day. Had leprosy continued, 190,000 such houses of refuge would be required today, while as a matter of fact there is not one leprosy in Europe an abolished disease. We can likewise abolish smallpox, typhoid, diphtheria and tuberculosis if we go about it the right way and make use of the means which medical science and the tireless research workers of the world have given to us.

Population of the World

Was 830,000,000 in 1830 and Has Since Doubled

In the year 1830 the world had only 830,000,000 inhabitants. Since then the population has doubled. How estimates that in the year 2022 the world will have three and a half times as many people as now. "Race suicide" is a mythological evil; doesn't exist at all, from a broad world viewpoint. The day may come when all habitable parts of the earth will be as overcrowded as China.

But that the overcrowding problem will be solved some day is a pretty safe bet. As for the present, the farmers will be grateful for more mouths to feed with their surplus products.

No Cause for Alarm

Not Likely Japan and China Have Designs on Canada
Every now and then some hot-headed orator raises in his place to toll the world to beware of the east. But what real reason is there for believing that Japan and China have designs on Canada, or the United States? Both of the latter countries have used strange tactics in dealing with those two peoples, but we are still on good terms with them and will continue to be as long as civilized statesmen have the last say. We must make it our business to see that cool heads continue to be in a position to have the last say—Border Cities Star.

Water Famine in Tokio

The drought has become so acute in Tokio that a water famine is feared. Inhabitants are utilizing ponds and private wells. So far the foreign colony is not affected.

Milner's Liniment Fine for the Hair.

Our Northern Words

Heavy Cost of Preserving Law and Order Among the Eskimos

Quite evidently the Eskimo inhabitants of the northern coastlands of Canada need a good deal more relative attention than the mounted police can give them under the strength of that force is very considerably increased. They would get it, too, if there was any way of making them pay the cost. They seem to be one class whose poverty and remoteness give them exemption from taxation. That being the case, the rest of us will have to count it part of the white man's burden to go on establishing police posts and patrols in that far hinterland in order to keep the Eskimo from killing one another and murdering missionaries and traders who wander into their domain—Edmonton Bulletin.

Joint Soreness Subdued, Swellings Quickly Reduced

Wonderful Results From Rubbing the Sore Parts With

NERVILINE

"My testimony should convince anyone that 'Nerviline' is a splendid preparation for the swelling joints. Rheumatism left me badly crippled," writes Amos P. Fleury, from Kingston. "I went to McKays Drug Store and they recommended Nerviline, which restored me completely." For Rheumatic pains, Lumbago, Sciatica, you get lasting satisfaction from a 85c bottle of Nerviline. Sold everywhere.

Rejection of League Protocol

Wall Street Journal Says Empire's Stand is Next Thing to Withdrawal From League

The Wall Street Journal declares editorially that the British Empire's rejection of the protocol of the League of Nations "is the next thing to withdrawal from the league itself."

The empire's action indicates that the English-speaking races have no intention of effecting any dangerous alliances, and continues:

"The bonds which united the British commonwealth to Great Britain are supposedly tenuous, but they held hands of steel during the Great War. They have disposed of the protocol with a promptness calculated to make its authors gasp. There is no international league which compels the adhesion of Great Britain to the Monroe doctrine. Nevertheless, the statement as to where Great Britain stands on that point."

FEELING TIRED IN SPRINGTIME

Not Sick, But Not Quite Well—You Need the Help of Dr. Williams' Pink Pills

With the passing of winter many people feel weak, depressed and easily tired. No particular disease, but the system lacks tone. You find yourself tired, listless, and often unable to get sound sleep at night. This is the result of indoor confinement of the winter months, and shows that the blood and secondary organs are weak. New, rich, red blood is what you need to put you right, and there is no other medicine that gives you this new blood as surely and as speedily as Dr. Williams' Pink Pills. This new blood goes to every part of the body, invigorates the general health. Digestion is toned up, you have a better appetite, nerves are strengthened and sleep is sound and refreshing. The value of Dr. Williams' Pink Pills when the system is down is shown by the experience of Mr. William Mitchell, R.R. No. 1, Bedford, P.E.I., who says: "I have been in poor, I found myself in a badly run down condition. My appetite was poor, I was easily tired and did not sleep well. I tried several other tonics, but did not get any relief. Then I decided to give Dr. Williams' Pink Pills a trial and soon found that I had got the right medicine. Gradually my strength came back, the dull, tired feeling disappeared, and after using the pills for about a month, I could eat heartily and was fit and active as ever. I have been my most cheerfully recommend Dr. Williams' Pink Pills as an unsurpassed tonic."

You can get Dr. Williams' Pink Pills from any dealer in medicine or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Game Law Conference Endorsed

Alberta has endorsed the proposed conference of game law officials of Canadian provinces and adjoining states. Manitoba proposed the meeting, and Minnesota has already endorsed it. Ontario has been asked to support the scheme. It is sought to provide adequate machinery for mutual protection and control of game on inter-provincial and international border lands and to breakers of law seeking immunity across these borders.

Nothing pleases a woman more than being able to convey a piece of information to another woman.

If mirrors portrayed us as others see us we would not use them.

Lack of National Sentiment

Mrs. Snowden Speaks About "Secession Talk" in Canada

The lack of sufficiently strong Canadian national sentiment, resulting in the east salting the west, and vice versa, and the failure of the Canadian people to realize the problems of each from a national viewpoint, said Mrs. Philip Snowden, speaking at a London correspondence, was mainly responsible for any "secession talk" which, she stated, was mostly negative. She had never met anyone who would admit to being in favor of secession, but many had broached the subject to her, anxious to convince her that no such sentiment existed, only an anger with the government for not attending more closely to the different needs of the various sections of the country.

Speaking of her large audiences in Canada, Mrs. Snowden said she found them appreciative, and their interest in the subjects on which she spoke, delighted. Her strenuous journey across the continent in less than a month, she said, had made it impossible for her to gather more than mere impressions of Canadian life and opinion, and these impressions might later have to be revised.

Canada's Fishing Wealth

Can Be Greatly Increased By Application of Scientific Methods

Canada's fishing wealth can be multiplied ten times by the application of scientific methods throughout the industry. This is the assurance given by Dr. A. G. Huntsman, director of the Atlantic biological stations.

The great extension of facilities for scientific investigation, projected at the Atlantic and Pacific coasts, on the inland waters of the Dominion was outlined by Dr. Huntsman. The new biological station at Halifax which had been erected for the purpose of studying and improving the methods of catching, freezing, smoking, salting and drying fish, and other researches directly relating to the fishing industry will be completed next month, and will bear the same relation to the fishing industry as the agricultural research colleges do to agriculture.

Another new station will be begun this summer at Prince Rupert, B.C. The appropriation for the two is \$70,000. The other western station is at Nanaimo. Stations operated on the west coast for some years have been abandoned.

Help On-to-the-Bay Movement

Manitoba Government Makes Contribution in Support of Project

The Manitoba Government has decided to make a grant of \$2,500 to the On-to-the-Bay Association, and provision for it will be made in the supplementary estimates. The proposed grant is one-quarter of the sum asked by the association, and is not to be considered as an annual contribution. It is stated. Premier John Bracken plans to visit Ottawa at the close of the present session of the legislature, to place the views of his government on this, and other matters, before the federal authorities. He appreciates the fact the support of a strong executive, such as that of the On-to-the-Bay Association will lend strength to the pleas he will advance.

Many Immigrants Arriving

Average of Fourteen Thousand a Month for Ten Months

Immigration to Canada, including Canadians returning from the United States, has averaged a little over fourteen thousand a month for the ten months of the fiscal year up to and including January, according to a statement issued by the department of Immigration and Colonization. The total returns for the ten-month period is 141,093. Regular immigration, not including returning Canadians, amounted to 102,577, of which 49,863 were British; 13,721 from the United States and 39,992 from other countries.

How can a man be expected to hit the mark if he leads an aimless existence?

There's no need of accidents if you'll drive carefully and learn to read a jay-walker's mind.

GIN PILLS FOR THE

KIDNEYS

Proper functioning of the kidneys is essential to good health. Gin Pills correct all kidney troubles. Get a box to-day, and be well.

A Farm Book-keeper for 10 Cents

EVERY farmer ought to know what his farm is making for him and which departments, if any, are not paying. To this end he needs a simple record of receipts and expenditures, along with yearly inventories of land and buildings, stock, machinery, feed and supplies.

The Department of Agriculture at Ottawa offers, for 10 cents, a "Farmer's Account Book," which is a few cents from that country.

Send 10 cents for the Account Book, and you will also receive a list of our latest list of free publications. Fill in and return this coupon to

Taking French Capital to Belgium

Alleged Plot of Belgian Bankers Has Been Disproved

Nearly \$20,000,000 francs in capital are estimated by the judicial authorities to have been exported from Valenciennes, France, chiefly to Belgium, in the last three months. It is claimed that Belgian bankers began a systematic campaign to encourage the exportation several months ago. This is reported to have been revealed through the arrest of a Belgian doctor at the frontier. He had disguised himself as a hunchback, his false name being stuffed with French securities.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Just from the street, from flowers, from grain and various other irritants may set up a trouble in the lungs. It is called asthma. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Would Increase Radio Fees

Advocates Heavier Tax On Listeners

In "So That Radio Can Progress" an increase in the radio fee to list is advocated to be adopted to the special copyright committee of the House of Commons by R. H. Combs, Canadian Radio Trades Association, Toronto.

"I would suggest that the fee be raised," stated Combs, "to be able to make a grant of \$2,500 to the On-to-the-Bay Association, and provision for it will be made in the supplementary estimates. The proposed grant is one-quarter of the sum asked by the association, and is not to be considered as an annual contribution. It is stated. Premier John Bracken plans to visit Ottawa at the close of the present session of the legislature, to place the views of his government on this, and other matters, before the federal authorities. He appreciates the fact the support of a strong executive, such as that of the On-to-the-Bay Association will lend strength to the pleas he will advance."

B.C. Berry Growers

Are Looking Forward to a Good Season in 1925

British Columbia berry growers are looking forward to a good season in 1925. A recent survey shows that there are now 1,325 berry growers in the province, located in the Fraser, Kootenay, Okanagan, Salmon Arm and Vancouver Island district. The same survey shows that the acreage under largely devoted to the cultivation of raspberries, strawberries, loganberries, red and black currants and gooseberries.

It Will Prevent Ulcerated Throat

At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who have been periodically subject to quinsy have thus made themselves immune to attack.

Were Wrapped in Straw

Shipments From Orient and Europe Are Turned Back by Government Officials

Six hundred cases of Portuguese wines have been added to a growing array of consignments brought into Vancouver from the Orient and from Europe, and now waiting return to the ports from which they were shipped.

Dominion authorities have refused entrance to the wine because it is wrapped in straw which is not covered with a certificate signed by a recognized sanitary authority.

A recent addition to the rejected freight is a straw packed statue destined to adorn a church in Edmonton. Orders have been received for its return to France.

Eighty-eight per cent. of the French houses destroyed during the war have been rebuilt, and 8 per cent. of the trenches have been filled in.

There are words of thoughts. Decide if you would like to be where one is going before you follow it.

Milner's Liniment for Colds

Spreading Good

Wants Everybody to Know That Dodd's Kidney Pills Have Relieved Him of Kidney Complications

Joseph Hardy, After a Long Period of Sickness Says Dodd's Kidney Pills Have Done Him Good. Mistaken. "I feel quite well again after suffering for seven years. Joseph Hardy, a well known resident of this place is recommending to his fellow countrymen Dodd's Kidney Pills."

"I have used Dodd's Kidney Pills and found them very satisfactory." Mr. Hardy states in an interview. "I suffered with my head and heart. I could not sleep very well and I was always tired and nervous. I took half a dozen boxes of Dodd's Kidney Pills and they have done me much good. I make no error in recommending them to my fellow countrymen as a remedy for sick kidneys. If you have any symptom mentioned by Mr. Hardy you may be sure your kidneys need attention. Neglected kidneys are the cause of more than half the ill-to-which mankind is heir. Dodd's Kidney Pills act directly on the kidneys, making them strong and healthy. Sound kidneys mean pure blood. Pure blood means good health."

Manitoba Agricultural Products

In 1924 Were Nearly Double That of Previous Year

Agricultural products in the province of Manitoba during the year 1924 reached a total estimated value of \$164,312,857, according to figures issued by the provincial department of agriculture. This amount is nearly double that of the previous twelve months. The greater part of the spread is accounted for by the difference in the value of field crops during these two years.

People who never look forward to the future seldom manage to get ahead.

A NATIONAL ERA OF EXPANSIONS IS DUE IN CANADA

Toronto.—An optimistic note was sounded by General Sir Arthur Currie when he addressed the Empire Club at luncheon here. The former commander of the Canadian corps and present head of McGill University, Montreal, declared that Canada stands in the beginning of a national era of expansion. He commended those individuals who "talk disparagingly of national bankruptcy," and urged the conquest of "national fear."

Sir Arthur deprecated any rumors of secession or annexation, saying "there is practically no feeling of secession in the Maritime, and there is practically no feeling for annexation in the prairies."

Canada's problems, he said, are internal problems of debt, taxation, unemployment, railways, immigration, labor, provincial jealousy, and misunderstanding, and of unjust sectional demands.

"The wall of our Jeremiah is echoed from ocean to ocean," he continued. "This continuous wall has a most depressing and injurious effect upon the country."

Livestock Act Changes

Minister of Agriculture Will Propose Certain Amendments

Ottawa.—The minister of agriculture will propose in the House of Commons shortly amendments to the Livestock and Livestock Products Act, by making provisions:

1. To facilitate business on the stockyards by providing that all moneys received on account of sales for livestock sold by a commission firm on behalf of the owner shall be deposited in a shippers' livestock commission account instead of a shippers' trust account as at present.

2. To provide for the licensing of egg buyers, egg collectors and dealers and exporters of livestock, meat, poultry, eggs, and wool.

3. To amend the power to make regulations as to the manner in which eggs found to be unfit for human consumption shall be valued and disposed of.

To Prevent Use Of Adulterant In Butter

Minister of Agriculture Providing For Stricter Regulations

Ottawa.—Stricter regulations of the manufacture of butter and cheese and of canned foods, will be provided in legislation to be submitted to parliament by the minister of agriculture. The legislation will prevent the use of oil as an adulterant in butter and forbid the keeping of foreign fats, which might be used for adulterating purposes, on the premises of any persons engaged in the manufacture of butter. Inspectors will be authorized to seize illegal dairy products. Canned fruit or vegetables are to be sold only in prescribed containers, which must contain a regulation weight or quantity.

Marquis Of Curzon Is Dead

Famous British Statesman Fails To Recover From Operation

London.—Marquis Curzon of Kedleston, Lord President of the Council, is dead.

Death came at 5:30 o'clock.

The Marquis collapsed on March 5 at Cambridge, while he was dressing to attend a public dinner. It was said at the time that he had suffered from a hemorrhage. All his immediate engagements were cancelled, and he was brought back to London the following day. On March 9 he underwent a serious operation, and since that time he had gradually failed.

Branch Line Proposed

Ottawa.—Although confirmation is lacking at the railway department, it is asserted here by parliamentarians who claim to have information from the Canadian National headquarters in Montreal, that in this year's branch line programme, a road connecting Regina with Avonlea is considered and is likely to be included. Such a line would link up the provincial capital directly with the south coast.

Make Tour of Trip Lines

Edmonton, Alta.—Count de Branto, Paris, France, has returned from Jasper Park, where he went over the trip lines of "Carley's" trail in company with the trapper, a hunt of 500 miles, with snowshoes and dog teams. Owing to the deep snow, the fur catch was small, mostly lynx. The count will shortly leave on his return trip to France via Winnipeg.

W. N. D. 1929

British Statesman Passes

Marquis Curzon of Kedleston, former British Foreign Secretary, and former Viceroy of India, who died in London.

Eastern Financiers

May Visit West

Need to Get More Intimate Knowledge Of Conditions on the Prairies

Lethbridge, Alta.—Eastern business men are ready to form their opinion of Western Canada sitting on the rear end of an express train. "We want to get them out here, mingle with them, and let them see our viewpoint, and learn of our hope for Canada."

This was the assertion of Mayor Hardie at a board of trade meeting, when the movement was launched looking to the organization of a tour of Western Canada this summer for representative Eastern Canada bankers, mortgage company heads, wholesalers and other business men.

His worship is an enthusiastic advocate of the tour, believing it will go far in solving the so-called "east and west" problem. This view is also held by President H. W. Crawford of the board. The matter was left in their hands, with Vice-President A. B. Hogg, a former Toronto man, who will get in touch with boards of trade both in the east and the west, particularly with the Toronto board of trade, that organization making the suggestion that brought about the larger plan in the minds of Lethbridge business men.

To Retain Liquor Profits

Liberal Government Will Not Divide Surplus With Municipalities

Edmonton, Alta.—The government has no intention of dividing the liquor profits with the municipalities of the province as promised last year, according to an announcement made in the legislature by Premier Greenfield. This was the first public announcement as to the policy of the government in this respect.

The reasons advanced for not giving the municipalities a share of the profits were:

First, that the province this year will be able to exactly balance its budget with the liquor profits, which are estimated at \$1,600,000 for 1925.

Second, that if the distribution of the profits were made, additional taxation would have to be imposed to make up the deficiency in provincial revenue.

Graham Favors Senate

Is Essential to the Stability of the Dominion

Montreal.—That the senate was essential to Canada's stability and should not be abolished, were declarations at the annual banquet of St. Patrick's Society by Hon. G. P. Graham, minister of railways and canals. Mr. Graham likewise defended the governor-general who has represented the throne in the Dominion, disagreeing with those who think Canada should have a Canadian as a governor-general.

Aeroplanes Prevent Fires

Forest Patrol Cuts Fires On Federal Reserves In Two

Ottawa.—Fires on federal forest reserves have been cut almost in half, states the annual report of the department of the interior. The success of the aeroplane in patrolling inaccessible districts and beating fires in their early stages, the report adds, has been clearly established, and it is hoped to have even more effective organization in the future along these lines.

Nominate Candidate

Montreal.—O. D. Hill, M.P., barrister and prominent as a protagonist of the Hudson's Bay Railway, was nominated as Liberal candidate for Montreal provincial constituency here on the first ballot.

Export Duty On Wheat Is Not Favored

Ottawa.—There will be no export duty on wheat, as was mildly suggested. In the report of the royal commission inquiring into the grain trade, in connection with the budget, the matter has been considered, but the proposal will not be acted on. The idea embodied in the report was that an export duty, in stopping the flow of Canadian wheat to American millers who grind it for export, and when doing so get a rebate of duty, might operate to a removal of the American tariff on Canadian wheat generally.

Says West Freight

Rates Too Low

Winnipeg Alderman Concludes Investigation Of Western Railway Situation

Winnipeg.—"Western Canada is suffering from too low and not from exorbitant freight rates," Ald. J. O. Sullivan asserted on his return from Montreal, where he has spent seven weeks probing the western railway situation, in relation to the proposed Peace River Valley extension.

Grain rates in Western Canada, Ald. Sullivan declared, were the lowest in the world, about 75 per cent, lower than those in the United States for similar distances.

"When a rate gets so low there is no margin left with which to pay interest on investments, and the country will consequently suffer from stagnation," there will be no development even in those parts where prospects of traffic would justify the construction of railway lines," Ald. Sullivan said.

He declined to commit himself relative to the Peace River situation, stating it would be poor taste for him to discuss a report which had not been made public by the export engineers of the two railway companies.

TORNADO TAKES TERRIBLE TOLL IN CENTRAL STATES

Chicago.—A tornado which tore through Southern Illinois after lashing Eastern Missouri, caused considerable damage in Indiana, before it died out to the northeast, after collecting a reported toll of 2,851 persons, dead or injured, on the basis of estimates available from the storm-swept regions, where communication was largely destroyed.

While darkness and prostrated wires made the collection of data difficult, estimates which came in through various sources, with ever increasing totals, placed the total dead at 823 and the injured at 2,990.

The destruction of property was enormous. Several towns were almost entirely wiped out, and such populous places as West Frankfort and Murphysboro lost whole blocks of buildings. In the town of Parrish only three persons were said to have escaped injury or death out of a population of 500.

The wind was so powerful at Parrish that bodies were carried more than a mile, it was reported. At Murphysboro, where the dead totalled 100, a schoolhouse was blown over the heads of 245 pupils, while at Decatur estimates placed the dead at 100 and the injured at 300, out of a total population of 703.

Brandon—in the fading of carol classes at the Manitoba Winter Fair here, J. Tate, of Warren, Man., was awarded first prize for the best 15 finished stiers, with the first prize group at the Winnipeg rodeo, and the stocker show last fall. R. Fleming, of Calgary, was second with 15 Herefords; S. J. Henderson, Lacombe, third, with a group of Aberdeen Angus that were second at the Calgary stock and feeder show last fall; Thomas Webster, Portage la Prairie, fourth; and R. J. Phil, Moonbeam, Sask., fifth.

Haig May Visit West

Regina.—Earl Haig may visit Saskatchewan on his Canadian trip, next summer, as a reward received this morning by Premier Dunning, from Ian Mackenzie, Dominion vice-president of the G.W.V.A., and chairman of the national conference, promises that the utmost efforts of the committee will be exerted to induce Earl Haig and his party to visit this province.

Retain Cologne Bridgehead

Paris.—Diplomatic circles believe the Cologne bridgehead is likely to remain occupied for an indefinite period as a consequence of the rejection by the British Government of the League of Nations protocol.

May Assume Management

Former Vice-President of the British Empire Steel Corporation, who, it is said, English directors desire to bring back to the management of the corporation.

D. H. McDougall, former Vice-President of the British Empire Steel Corporation, who, it is said, English directors desire to bring back to the management of the corporation.

Settlers From Hebrides

30,000 Acres of Land Purchased in Vermilion District

Montreal.—The Scottish Immigrant Aid Society, through which the immigration to Canada of settlers from the Hebrides has been carried out, has, through the provisions of the Empire Settlement Act, purchased 30,000 acres of land north of Vermilion, Alta., on which it is proposed to settle this year 150 Hebridean families, it is announced.

Through funds secured through the Empire Settlement Act, the society is building homes on each quarter section of the block. Everything will be found ready for the settlers on their arrival, and each family will be assisted with a loan to get farming operations under way.

Warned Against War Menace

Senator Says Canada's Greatest Danger Lies In Pacific

Ottawa.—The Canadian Parliament was not consulted and should have been consulted, on Canada's attitude to the League of Nations protocol, Senator Poirier declared in the senate.

For lack of parliamentary endorsement, Premier King's dispatch to Geneva lacked force, he said. Canada was drifting into a system of alliance similar to that which produced the Great War. Isolation was now impossible, and without the safeguard of the League of Nations, Canada might be committed to participation in future wars.

The greatest danger lay, he said, on the Pacific, where a Russian-Japanese-Chinese Alliance would menace the peace of North America.

Outlook Brighter For Home Bank Depositors

Government to Consider Return of All Deposits

Ottawa.—Present indications say that the government will reimburse of full the losses incurred by the Home Bank depositors over and above what is realized from their assets. Legislation to be brought down shortly in connection will be based on the claim that the warlines given in 1914 were not acted on by the finance minister, Sir Thomas White, for fear of imperiling war finance. While the motive is not assailed, it will be argued that the bank depositors should not suffer.

Reduction of Armaments

London.—Premier Baldwin, replying to a question in the House of Commons, said he thought it already was well known that it was the desire of the government to prompt the reduction of armaments by any appropriate means, but he was glad of the opportunity of again making it clear.

Chambers' Islands Report Quake

London.—Severe earth shocks were felt along the northern coast of the Isle of Jersey and other of the Channel Islands. Residents of Jersey, who were the nearest felt in the locality for many years. No damage was reported.

Fire Ravages Tokio

Tokyo.—Twenty thousand persons were rendered homeless when a major conflagration swept Northeastern Tokyo, destroying 3,000 buildings and resulting in unestimated casualties. The fire was brought under control.

Purchase Not Authorized

Ottawa.—The Vancouver board of harbor commissioners has not been authorized to purchase a new harbor tug, "H. H. Stevens," intended to be in the House of Commons by the minister of marine and fisheries.

Self Government Vested

Ottawa.—Seven members of the Canadian Government Merchant Marine have been disposed of since the line was established. It was stated in the House of Commons in answer to a question from W. A. Black, Conservative, Halifax.

Probe Wheat Price Fluctuations

Washington.—Secretary Jardine has directed the grain futures administration to make an immediate investigation of the recent violent fluctuations in the market price of wheat.

United States Will Not Use Singapore Base

London.—Foreign Minister Austen Chamberlain denied in the House of Commons the possibility of use by the United States of the British naval base at Singapore, and that the question even had been discussed. Replying to a further question whether an understanding of any kind exists between British and United States naval authorities, Mr. Chamberlain said that he would find it easier to answer the question if he was confident that he understood it. "As it is, I will confine myself to saying that, so far as I know, there is not now, and I hope there never will be any understanding between British and American authorities," declared Mr. Chamberlain.

Co-operation Is Need Of Empire

Development of Imperial Resources Is Considered Important

London.—At the first meeting of the imperial economic committee, which was appointed recently to deal with the marketing of empire products in the United Kingdom, in preference to foreign imports, Sir Philip Cunliffe, president of the board of trade, in welcoming the members of the committee—representative of all parts of the empire, remarked that the committee was a cross authority, and not an executive, in which respect it resembled the imperial advisory committee. He emphasized the importance of development of the imperial resources and mutual trade among the various parts of the empire, and assured the committee that the government departments would do all in their power to assist its work. Sir Halford Mackinder, chairman of the committee, said it was an experiment in empire co-operation, and not an attempt at empire government. The future development of the empire, both in trade, and in constitution, lay in the application of the principle of co-operation.

F. Forsyth-Smith and L. McQuinn, of United Kingdom, the Canadian representatives of the economic committee.

TO BRING 1,000 FAMILIES EACH YEAR TO CANADA

London.—Sales of families to Canada under the reciprocal scheme for overseas settlement between the Imperial and Canadian Governments have just commenced for the season. One thousand families each year for the next three years is the mark aimed at. For the season of 1925, it is understood that about 500 families have already been secured and that the immigration authorities will feel satisfied if another hundred families can be accepted for this season.

The parties leaving now are going in comparatively small numbers on different vessels. The Canopic this week, however, carried thirty British families to Canada, totaling 168 individuals, giving a good average of five to the family.

Will Revise Grain Act

Ottawa.—Hon. T. A. Low stated that it is his intention to proceed this season with the consolidation and revision of the Grain Act. There have been reports that it might be deferred but as the present act is obsolete, it is desired to revise it as soon as possible, and the new bill is being drafted by Mr. Justice Turgott, largely on the lines suggested in the grain commission's report.

Likely Successor to Lord Byng

London.—Seven members of the Canadian Government Merchant Marine have been disposed of since the line was established. It was stated in the House of Commons in answer to a question from W. A. Black, Conservative, Halifax.

Seven Disposed of Since Line Was Established

Ottawa.—Seven members of the Canadian Government Merchant Marine have been disposed of since the line was established. It was stated in the House of Commons in answer to a question from W. A. Black, Conservative, Halifax.

Settlers From Sweden

Winnipeg.—From now until 1927, at least only 5,000 settlers will be available for immigration to countries other than the United States, a large percentage of them will come to Canada, according to H. P. Albert Hermon, M.P. for Canada, in the Saskatchewan Legislature, in an interview here.

City Destroyed By Flood

Lima, Peru.—Official and private radio advice from Trujillo, the chief inspection city, says that the city has been completely destroyed by inundation, caused by torrential rains.

PROVISIONS FOR THE SALE OF BEER IN ONTARIO

Toronto.—Provision for sales of beer of 2.5 per cent. alcoholic content, or 4.4 proof spirits, in standard hotels, restaurants and grocery stores, is made in amendments to the Ontario Temperance Act which were introduced in the Ontario Legislature by Hon. W. F. Nickle, Attorney-General, and given first reading.

In the case of grocery stores, the beverage will be sold for outside delivery only, while in hotels and restaurants the stipulation is made that service must be given at tables, to avoid a reversion to the bar system which received its death blow in Ontario in 1914.

Other amendments reduce the number of prescriptions to be allowed a doctor from 50 to 30 per month, while the minimum fine on conviction of having liquor in the possession is cut from \$500 to \$100.

A fee for a permit to sell beer will be charged, but the attorney-general made it clear that this was to be for controlling purposes, and not to obtain profits.

Proposed Prison Reform

Lady Member of House Urges Payment For Convict Labor

Ottawa.—Miss Agnes MacPhail, Canada's only woman M.P., proposed in the house such changes in the administration of penitentiaries as would provide:

(1)—Sufficient productive work to keep the inmates employed.

(2)—That a share of the proceeds go to provide for dependents, and, in case of no dependents, such share be held in trust until release.

The resolution received warm support from both sides of the House of Hon. Ernest Lapointe, minister of justice; Sir Henry Drayton, who at the time was leading the Conservatives; and Robert Froske, Progressive leader, announced their intention of voting in favour of the bill. The Liberal, Hants, had an amendment to eliminate the provision in regard to the prisoner with no dependents.

Time Extended For Starting Western Lines

Manitoba and Northwestern Railway Given Two Years

Ottawa.—Extension of time for two years within which to commence construction of the Manitoba and Northwestern Railway, extending from The Pas, Man., to the northwestern corner of the province, was approved by the railway committee of the House of Commons. An extension of time for two years, in which to commence construction of two branch lines in Alberta, one from Cardston to Glenwoodville, was also approved in favor of the Alberta and Irrigation Company.

Government Steamers Sold

Seven Disposed of Since Line Was Established

Ottawa.—Seven members of the Canadian Government Merchant Marine have been disposed of since the line was established. It was stated in the House of Commons in answer to a question from W. A. Black, Conservative, Halifax.

Seven Disposed of Since Line Was Established

Ottawa.—Seven members of the Canadian Government Merchant Marine have been disposed of since the line was established. It was stated in the House of Commons in answer to a question from W. A. Black, Conservative, Halifax.

Local and General Items

Corporal Hildson was down from Claresholm during the week.

That so-called "weekly dose" of \$3.60 could be rightly called a weekly dose.

Corporal Frewin, A.P.F., has been transferred from Medicine Hat to Nanton.

Many a man calls his wife the better half, when she is really about ninety per cent of the family.

Mrs. M. Daly, of Coleman, announces the engagement of her daughter, Florence, to Fraser Edmond, of Calgary.

Local people who cannot say a good word of the local play "The Private Secretary," should be tarred and feathered.

The Wembley exhibition had a shortage of some \$30,000,000, which the British government has undertaken to pay.

In their first game with Varsity, Port Arthur—the team that defeated the Coleman Tigers—blanked the easterners 4 to 0.

The United States will reduce national taxes \$300,000,000 for the fiscal year 1926, as a surplus of \$378,000,000 is estimated for 1925.

The question of who is most wrong or most right in the mine wage dispute is less important than the question of a fair and speedy settlement.

Mr. LeCappellain, popular district traveller for the Wood-Vallance Hardware Co., was called from Lethbridge to Vancouver last week, owing to the illness of his father.

Because Dempsey declined to accept the offer of Harry Wills for a world championship bout, he and his manager, Jack Kearns, have been placed on the ineligible list.

Auditor Binn, of Calgary, was in town yesterday, auditing the books of the local vendor store. His son Donald was at one time on the staff of the local branch of the Union Bank.

A weekly paper suggest that the provincial government might divide the liquor profits among the liquor consumers. Otherwise the non-drinkers are benefiting through the drinkers.

The annual statement of the British Empire Steel Corporation for the twelve months ended December 31st last shows a deficit for the year totalling nearly two million and a half dollars.

The total enrolment in Alberta's public and secondary schools was 147,378 for the term ending in 1924, being 672 less than the previous year, but an increase of 1184 in the enrolment of those grades above VIII.

Mr. H. A. Howard, manager of the Trusts & Guarantee Company, Limited, Calgary, and Mr. J. M. Windsor, chief inspector of provincial branches of the Union Bank of Canada, were visitors to Blaimore on Tuesday.

The Nanton News tells: "A herd of elk arrived here this afternoon from Blaimore. They appear to be hornless and harmless, but big doings are expected tonight when the elk's lodge will be instituted here."

Mrs. W. D. Spence, of Edmonton, who was in Calgary attending the executive meeting of the I.O.D.E., spent Monday in Banff, leaving in the evening for Pincher Creek, where she will spend a day or two, enroute to Blaimore—Lethbridge Herald.

Mr. A. L. Freebairn, of Pincher Creek, will be at the F. M. Thompson Company's main store on Tuesday next, April 1st, showing an extensive range of the very latest models and materials in ladies' coats, dresses, etc. Call in and let them show you these goods.

It is estimated that the duty on electricity will bring in an annual revenue of approximately \$400,000.

A Chinaman and a negro were convicted as holdups at Montreal and sentenced to twenty-five years each.

The local arena has closed down for the season and Mr. Pepper, the ice man, left here for his home the early part of the week.

The Baker and Palm Beach hotels were destroyed by fire on Wednesday of last week, the loss totalling about five million dollars.

One-hundred-dollar counterfeit bills being in circulation, we would request our debtors to pay up in bills of small denominations.

Decapitation, or in the words of the Reds, "Recall," of Mayor McLeod, is the latest promised excitement. Copies of programmes will be issued in a few days.

A whist drive will be held in the Lodge Hall on Monday night by the members of Vimy Chapter, O.E.S., commencing at 8 o'clock. Everybody welcome.

School Inspector Bremner is up from Macleod this week, looking over the lower grades of the local school. He is accompanied on his visit by Mrs. Bremner.

Paul Merland, a fourteen-year-old boy living at Bernierie, Egan, now weighs 504 pounds and is still growing. His weight increased forty-two pounds in the last year.

The Canadian Pacific Railway will put on the Transcontinental Flier on May 17th, with an 88-hour schedule from Vancouver to Montreal, cutting two hours off the 1924 time.

Mrs. D. K. Allan, of Coleman, is in attendance at the provincial meeting of the Women's Missionary Society of the Presbyterian church at Edmonton, where she will give a report on Home Helpers' work.

A lodge of Elks was instituted at Nanton on Thursday night last, with a membership of 125. The Blaimore Third Degree team assisted in the ceremonies, in charge of "Tiny" Garrison as our Baby Elk.

The marriage of Miss Margaret Maxey, of Calgary, to Francis George Buckenfield, of Three Hills, was solemnized at the home of Mr. and Mrs. James Maxey, 818 Fourth Street northeast, Calgary, on March 6th.

The Blaimore Elks' Third Degree team won favor at Nanton last week. So much was their work appreciated that they were handed a big fat cheque towards their expenses. Upwards of 120 candidates were initiated.

"Tiny" Garrison (220 pounds) and W. J. Bartlett (200 pounds) took a 24½-mile hike to Michel on Monday, returning by train. They are next hoping to lead a bunch of "don't want works" on a pleasure pilgrimage to Edmonton.

Mr. Wallace Forgie, secretary of the Boys' Work Board for the province of Alberta, has tendered his resignation, to take effect in June. Mr. Forgie came from Toronto to take up boys' work in this province just five years ago.

Mr. J. Mackie, managing director of the Hillcrest Collieries, Limited, left Hillcrest for Montreal on Tuesday night. His final statement was that "the mines of the Hillcrest Collieries will be operated on the Fermie terms, or not at all."

Charges of misappropriation of more than \$100,000 of the old age fund of District No. 21, of the United Mine Workers of America, are made against Andrew McGarry, the district president, and other officials in a petition on file in the Oklahoma district court. The action has been brought by members of the union.

Eight holdups have been given life sentences at Montreal.

The government proposes to curtail Chinese immigration by placing a ban on eggs.

Hon. Alex. Ross declares that the L.W.W. are leading the workless in this province.

Hon. J. A. Robb's federal budget shows a surplus for 1924 of \$1,223,000. Many taxation reductions and some eliminations are suggested.

Thirteen persons were killed and a large number injured when two mail and passenger trains collided in Louisiana early Sunday morning.

A bolt from an aeroplane caused an explosion on a barge at Philadelphia. An enquiry has been instituted to find out what nut dropped that bolt.

Another of the weekly series of social dances will be held in the Lodge Hall on Saturday night, under auspices of Blaimore I.O.O.F. Lodge.

Constable Ray Hobkirk, formerly with the Royal Canadian Mounted Police, who recently joined the A.P.F., is temporarily stationed at Coleman.

Certain local individuals have maintained a somewhat quieter attitude towards the higher-up officials of District 18 since receiving tips last week.

Coleman's Selkirk has reached their homes at or near Winnipeg, and by now may be seeking provincial naturalization papers for that province.

Staff-Sergeant Cotteridge, of the R.C.M.P., formerly of Lethbridge, is under arrest in Rochester, N. Y., charged with embezzlement of approximately \$2,000.

The annual meeting of the provincial chapter of the I.O.D.E. will be held in Calgary on April 29th and 30th. Mrs. R. C. Marshall, the provincial president, will preside.

The appeal of Amelius Jarvis, who last fall was sentenced to a fine of \$600,000 jointly with Peter Smith, has been sustained and the fine reduced to \$60,000. Smith's portion of the liability has been reduced to \$100,000.

Mrs. Margaret McLaurin, beloved wife of the veteran ex-superintendent of Baptist missions in Alberta, passed away last week. Interment took place at Calgary on Monday of this week.

The preliminary hearing of the charge against John Kolesavich took place at Medicine Hat last week end. He has been sent up to stand trial for the murder of James Calkins, C.P.R. brakeman, on March 9th.

Mrs. D. A. Howe and children, who have been spending the last few months in the Old Country, will probably sail for Canada on April 18th and will reach here about the end of the month.

It is very interesting to note that for the year 1924 the cost of operation of the Lethbridge jail was reduced from \$309 per capita to \$177 per capita, and that during the twelve months not on inmate of that industrial institution ever suggested a strike. On the other hand they were all duty bound to "stand pat."

Bill Sherman, the job-holder president of District 18, in addressing a meeting of his victims here last week, made mild reference in an uncompromising manner to this paper as "The Blaimore Bladder." And this same bladder has done and is prepared to do more in a reasonable manner for the workers of this section than that same bladderskate ever intended to do.

Yank—"Compose a sentence containing the word 'invention.'"
Dutch—"Mine neighbor's son, Chon, clapped at mine door. I say 'come in.' Vell, in vent Chon."

Newied—"What's wrong with the pie crust? It doesn't half cover the pie."

Mrs. Newied—"Why, dearest, I asked your mother how to make them to suit you and she said to make the crust very short."—Boston Transcript.

British Columbia beer parlors are expected to open up on April 1st, Wednesday next.
